Summus Elena Face Mask

An intensively moisturizing, pore-tightening 3D face mask

How to use

Use the mask after washing and applying lotion.

To achieve maximum effect it is recommended to use the mask 2-3 times per week.

1. Before applying the mask, clean the facial skin carefully.
2. Take the mask out of the pack and unfold by pulling the special protruding edges in the upper part.
3. Apply the mask on your face. The mask center line must be aligned with the center of your face. Press the mask with your palms slightly so that it would thoroughly cling around your face.
4. Unbend the mask extended edges provided with cuts in both cheeks area and put the mask lower part on your neck. By holding onto the extended edges, pull the mask up along face lines to provide the tight fit.
5. Remove the fabric base in 10-15 minutes and lightly massage the face, distributing leftover serum on the skin.
