

# SUMMUS

## Summus Classic Pro 3D Face Mask

A classic face mask for intensive regeneration and protection of the skin

### How to use

Use the mask after washing and applying lotion.

Before opening the sachet, pat it lightly with your palms to distribute the mask serum inside so that the fabric base is soaked evenly.

After using the mask, apply face and eye creams to extend and enhance the treatment effect of the mask serum.

To achieve maximum effect, it is recommended to use the mask 2-3 times per week in the evening.

1. Thoroughly cleanse your facial skin before applying the mask.
2. Take the mask out of the sachet and unfold it by pulling the special protruding flaps in the upper part of the mask.
3. Put the mask on your face. The line in the centre must coincide with the centre of your face. Press the mask gently with your palms to create a good seal all over your face.
4. Detach the elongated edges of the mask with cuts in both cheek areas and place the lower part of the mask on your neck. Holding the elongated edges of the mask, pull it upwards following the face contours to get a tight fit.
5. Remove the mask in 10-15 minutes after application. Massage your face gently, so that leftover serum is absorbed through the skin. Do not rinse off the mask serum.
