

SUMMUS

Relax Pro Gel

Intensive gel with antioxidant effect

Usage

Apply a thin layer of gel on the skin cleaned beforehand, after using the lotion. After the product is absorbed, apply face cream.

Extra gel can be used locally, only on problem areas to deepen the constant care.

For local mask patches, use aseptic cotton cloths (or cotton pads). Moisten the cloth in filtered (not tap water) water, squeeze it thoroughly and apply a small quantity of gel on it. Spread the gel on the cloth, fold it at different angles. Apply the cloth on the face problem area (e.g. on nasolabial furrows) and keep it for 10 to 15 minutes. After that, remove the cloth and let the residual product to be absorbed, then apply face cream.

For the steady results, use the product two or three times a week.
